DETAILED ACTION***Allowable Subject Matter***

All claims are allowed. Claims 3-9, 17-20 are allowed. The following is an examiner's statement of reasons for allowance: As noted in the file history (including latest amendment at pages 8-11), the claimed inventions are meant to be within the situation of sending encrypted encryption processing information in accordance with a synchronous transmission mode, and sending encrypted specific information in accordance with an asynchronous transmission mode. Encrypted encryption processing information (e.g. encrypted encryption key) is sent by a second sending device to an information receiving apparatus in accordance with a first transmission mode (synchronous mode). Further, encrypted specific information (e.g. encrypted AV data) is sent by a first sending device to the information receiving apparatus in accordance with a second transmission mode (asynchronous mode). Accordingly, the present invention is able to transmit information (e.g. music information) at a high speed and in large amount with security being improved by ending the information. As noted at page 8, the second paragraph, these exact features or at least the analogous features are in all claims (including claim 6). The prior art did not teach or suggest the particular features of the claims.
